Lightning strikes twice; Friggs wins 1979 Truman

By TOMMY TORLAY Special Assignments Editor Lightening has indeed struck twice at UTM over the

past three years.

David Griggs, a political science major from Union City, won the distinguished Harry S. Truman Scholarship and followed in the footsteps of another UTM student, Steve Stafford, who was the first Tennessee student to win the award two years ago.

"The Harry S. Truman Scholarship award is a national award given to one person per state," said Griggs, who plans to pursue a career in public service or politics. "The award money is given by authority of Congress and will pay up to \$5,000 a year for school

According to Griggs all 27 colleges in Tennessee sponsor an applicant for the coveted award and the requirements are: an essay of 600 words or less that analyzes a particular public policy issue, high school transcript and a un-dergraduate scholastic record; and three letters of recommendation. The letters must be written by a faculty member in the student's field study and one must be written by another person who can speak on the student's potential for a career in public service. An administrative officer of the University prepares the third letter.

"There is a screen for the state competition and the student must have outstanding academic qualifications," said professor of political science, Dr. Theodore Mosch

Griggs, a sophmore, has een active in the SGA

Registration system subjected to survey

minutes.

By BILL ROGERS Staff Reporter

Last week's computer registration survey, evaluating the advantages and disadvantages of computer registration, is in the process of being collected and organized, according to Emily McClain, Registrar.

"It will be about two or three weeks before we get the final results," McClain said.

The survey was designed to report the strengths and weaknesses of the present registration system and allow the faculty and students to comment on their opinions of the present system.

The survey was administered to various faculty members, administrators and approximately 10 percent of the student body asking them for comments on the present registration system and if they would be opposed to returning to the "arena-type" of registration.
The old "arena-type"

registration required the following steps to be followed in order to enroll in classes at

1. Start by waiting in line outside the University Ballroom until allowed to enter; state full name once inside. Seniors could register with the first group. (The rest registered alphabetically rather than by number of hours passed) Approximate time required: 0-30 minutes.

2. Pick up your packet, fill out orange information sheet, green fees cards and auto registration card. (This was done by hand in ink) Approximate time required: 0-10

3. Proceed to school of your major to see advisor. (Here you presented your advisor the list of classes you desired if not done earlier - and he either approved or disapproved your list) Approximate time required: 0-45 minutes.

4. After seeing advisor, see a typist to have class schedule typed out. Approximate time required: 0-15 minutes. 5. Proceed to Fieldhouse to

pay fees and wait in line. Approximate time required: 0-45 6. Get I.D. card made by campus photographer and

validated. Approximate time

required: 2-30 minutes.
7. Proceed to "arena" and go to tables marked with courses needed. State section number you desire and pray that that section is open. If it is not, advisors are available to change your schedule. Approximate time required: 5 minutes - 2 hours (sometimes

Congratulations, you are now enrolled in classes at the University of Tennessee at Martin.

"Students seem to like the present system (computer registration) but some pro-blems do arise," McClain said, "Any weaknesses found in the present system will be reported to the Registration Committee.

David Griggs, one of two SGA Congress members on the Registration Committee, stated that questions have been raised by the administration regarding the advantages of the present computer system due to extra paper work and time-consumption involved with this type of

"If the administration finds that the students don't care they will try to go back to the old system," Griggs said.

Computer registration for Fall Quarter will be held May 14th through 18th and May 21st through May 24th. Summer registration will be from May

Obion County school consolidation. "I wrote on the school consolidation and tied it in with busing," said Griggs.
"The title of the essay was

'Bold Initiatives'. scholarship applicants is that they have two years of undergraduate work remaining. However, the first scholarship winner, Stafford says, "my award money is going to pay the first two years of law school.

The scholarship will pay the winner's tuition at the school of their choice, but both UTM recipents have chosen to remain at UTM.

"I'm gratified we have two Truman fellows and it's a pleasant surprise to compete so favorably in the national competition," said Dr. Mosch. "It's to these boys character to stay at UTM when they could have their tuition paid at schools like Harvard or Yale."

Having two Truman scholars in three years required cooperation and teamwork. "It can be contributed

partly to the excellent work done by Dr. Mosch and the UTM political science department," said Stafford. 'He has a complete dedication to his students and his work." Griggs said, "Dr. Mosch

and the Chancellor deserve a

great deal of credit for me receiving the Truman

scholarship."

Presentation of the award will be made in Independence, Mo. May 6 by Margaret Truman, the 33rd president's A requirement for all daughter. Many Missouri cholarship applicants is that dignitaries will attend the impressive ceremony at the Truman Library, according to Dr. Mosch.

"There will be a reception after the ceremony,"

Sunshine and Showers

As is usually the case during Spring Quarter, UTM has been blessed, so-to-speak, with a variety of weather. Last week, for instance, the outdoor activity increased immensely as an abundance of sunshine and high temperatures found their way onto the campus. Lately, however, such activities have been held to a minimum due to the rains which have been almost constant since the

Atrium Hall to close due to rising cost of housing

By STEPHEN WARREN **News Editor**

The administration will close Atrium Hall next year unless an alternative way to hold down housing rate incording to Phillip Watkins, vice chancellor for Undergraduate Life.

"The main reasons for this are increasing utility rates and decreasing enrollment of students living on campus," said Watkins.

Energy cost for residence halls have increased 27 percent this year; a 21.4 percent increase is expected next year. Hall supplies have increased 12 percent.

"Housing comes ur heading of auxiliary exeducational and general expenses are paid in part by the government. Housing must be selfsupporting," said Watkins.

'Enrollment has stayed up at UTM, as opposed to the nationwide trend, but this has been due mainly to increased graduate programs. Graduate students usually don't live on campus.'

"Our enrollment has stayed up, but our residents on campus have steadily declined."

Watkins said that Atrium is the most expensive dormitory ton campus to operate per student space.

closing Atrium the other dormitories on campus would be fuller, and therefore, operate more efficiently and Atrium would be closed.

Atrium is classified as type D housing for juniors and seniors only.

'We have only received 83 housing applications requesting Atrium next year." stated Watkins.
Atrium Hall will ac-

operating at capacity.

The closing of Atrium will leave five student dormitories open on campus:: McCord, Austin Peay, Ellington, G-H, and Clement.

Watkins said Undergraduate Life officials met with members of the housing office and decided that there would have to be a subastantial increase in the housing rate next year, or

living there would have to pay \$375 per quarter, and all other students living on campus would have to pay an extra \$30

'We decided that that closing Atrium would be fairer comodate 316 studentsw when to the students and would be the more popular choice,'

per year.

said Watkins. Students who made Atrium their first choice on their housing applications for next fall are asked to contact the

housing office to indicate their second choice. Watkins said that these students' new housing applications will be considered as being on time, and will be

education and health. They and campus organizations are made possible by donations and help from civic Winners from Area VII events will go to the Tennessee

THE PACER

Insight

The Pacer staff decided the topic of the draft

Registering for the draft is best solution for a war

War and draft is wrong

Europe; if it doesn't quickly escalate into a nuclear war; if NATO airfields and ports are not destroyed in the opening battles; and if we can build an enormous navel fleet that does not now exist, then the million men stationed in the United States will be useful in the next war.

The preceding paragraph was taken from an article printed in last week's issue of The Pacer, entitled "The Draft is Inevitable." The article also went on to state that the above premises are clearly absurd. But are they? It is this way of thinking that made the Vietnam conflict an absurdly long, drawn out, half-assed war. The draft is not the killer of freedom;

For some obscure reason, war is a way of life, has been for as long as anyone can remember, and probably always will be. Nobody argues that it's not wrong; and nobody will deny that war is hell. But let's face it, it seems to be here to stay, and the only thing to do is bite the bullet and drive on.

In otherwords, accept it; then do something about it. Looking the other way, pretending it doesn't exist, hoping that if we do nothing, then they'll do nothing, is a fool's dream. And like a fool, anyone believing in this philosophy is considered fair game by those who don't. Namely, the majority of the world's population.
The meek may inherit the earth, but only the

strong will be alive to see it happen

The volunteer army is good-in theory. Unfortunately, theory doesn't always work. In the event that armed forces are needed in a hurry, registering for a potentialdraft is the best solution. If the United States suddenly gets involved in another war, which is not unlikely.

The draft is immoral, unethical, and above

all else, inherently and undeniably wrong. As a matter of fact, any person, organization, or

other such institution which seeks to force other individuals into conformity with their

particular system of values is always wrong. It's as simple as that.

If the draft is reinstated, as it probably will

be given the primeval mentality of those who

make such decisions, the happiness and well-being of countless individuals will be needless-

by and irreversibly affected. The needs and desires of the individual within society should

always supercede those of the remainder of the

group. People should be allowed to live their

lives in peace and make their own decisions

about the role of the military. To force someone

To fight for freedom is self-contradictory and

No ideal, concept, or principle is worth giving up one's life for. Even worse than this is the no-

tion that people are required to support a cause that they may not really believe in or even

understand. No one should be compelled to

totally committed. We've been hearing since we were old enough to understand that the com-

munists are bad and that all they want to do is

we fail to realize is that the draft would do a

great job of accomplishing that goal without

ever having to worry about the communists

The U.S. government is telling us that THIS is

The UT System should be congratulated for

temperatures

large numbers of people are going to be needed, and fast.

Military thinkers estimate that the next war will last less than a month. This comes from the Yom Kippur war between the Arabs and the Israelies. Either they'll kick hell out of us in a hurry, or we'll kick hell out of them in a hurry.

The problem lies in the fact that it takes approximately six months to set up a draft, draft someone, process him, train him, and put him on a battlefield.

If we hope to stay the United States of America, the two obviously are not compatible.

If the Russians start a war, or anything else happens, what will happen to the million men already in the Armed Forces? Do we just sit back and let them get blown to bits, without even trying to help them? Do we just say, "Oh, well, they enlisted of their own free will," and leave it at that? Do we ignore the fact that they're over there, or here, or wherever in the world the next war is, fighting for you, me, God, apple pie, and everything that's ever mattered, or been believed in?

You tell me. Sure, nobody wants to give up his freedom, even temporarily, to fight in a war that he doesn't necessarily feel is justified. But isn't it better than giving up your country, your family, and your personal ideals for the rest of your life? Granted, you can get killed in a war; ou can also get killed crossing the street in front of your house.

The draft is not perfect. It's not the ultimate answer, either, but then, war is not the ultimate question. However, for the problem that a potential war creates, registering for the draft

right and subsequently THIS is worth dying for

It really doesn't matter to the government whether or not we really believe it. We are just

supposed to accept it and go along our merry

War is wrong. And since the military is in existence for the express purpose of engaging in

war, then the military cannot be seen as being

completely blameless either. If we truly live in

a democratic society, then let those who want to have a war go fight it. Leave it up to the peo-

ple to decide for themselves what they want to do. The circumstances may change and the ar-

mies may be fighting for what someone sees as

being the noblest cause in the world. So what.

It's still war, an abstract concept actualized by

to dictate to others what is best for them.

se who somehow feel they have the "right"

For a person to die fighting for a cause he

doesn't really believe in is no nobler than being

killed in a bar room brawl. In a sense, the per

son who is killed in such a situation is more

justified. At least he has some understanding of

what everything is about. In essence, however,

there is no cause so great or no cause so noble

as to force someone to give up his life and hap

piness in pursuit of it. People should live in the

present, always remembering the past and

looking to the future, but living in the here and

now regardless. Do what you feel is right, and

not what someone tells you is right. In this way

you'll have no one to blame but yourself for

close, personal friend). Whether on the open road or in your own campus backyard, there are so many interesting, adventurous alternatives to be explored. Take some time and think about it: the next time you head to the all-night store for some brew-pops and a pack of Twinkies, try a detour through Sharon, or maybe even Bradford-Doodle Soup capitol of the world.

Buck Rogers in the 25th Century

Movie Review

There comes a time when every reviewer has to agree with his Grump. It's not very nice. Who wants to agree with a bad tempered out of work demon? But this time there is no avoiding it when it comes down to "Buck Rogers and the Twenty-fifth Century".

One of the perpetuors behind this nightmare is Glenn A. Larsen, the same evil mind that launched "Bat-tlestar Galactica." In this revival of Buck Rogers, Larsen worked on the creenplay, produced it, and did various other nasty things to one of our dearly beloved serial and pulp characters.

This version's plot runs something to this effect. Buck Rogers is an astronaut who is put into space. His vehicle runs into some kind of technical difficulty and Buck is put into suspended anima-tion for roughly five hundred years, though the opening sequence makes it appear that he's only stoned that long. Either way you look at it, it's a long trip. He is revived aboard a giant space ship being run by some very nasty alien types who are all beautiful princesses, slave girls, or giant Russian cossacks. These people are on the way to Earth supposedly to negotiate a peace treaty, though they are

really planning to do some dirty work. They spend the entire ovie playing Buck back and forth between the treacherous aliens and the noble Earthlings who don't trust anybody as dumb as Buck.)

Gil Gerard plays Buck Rogers, and there is some doubt in my mind that he plays it the correct manner Gerard's Buck Rogers is not only dumb, but he is a com-plete idiot. He's even dumber than Lee Majors' Steve Austin, and that's going some He does have several things that qualify him for the hero role though. He's strong, handsome, and chauvinistic. role

Henry Silva is about the best actor involved, though how he got involved is a mystery to me. He does have a choice role though. He plays Kane, who in this version is a former Earth citizen who is now a member of the alien emperor's court and is planning to sell out the planet of his birth. In the original Kane was named Killer Kane and he was an old time Earth mobster who was selling out Earth. This recent attempt almost makes Kane look respectable. Silva plays the part nicely, and since the villain is so much more in-telligent than the hero you might easily wind--up rooting

The special effects aren't very hot. Most of them are on the same level as the worst of Battlestar Galactica", but there are a few moments where they do shine. The greatest problem with the special effects is that all the space ships and hardware looks too damn new. One of 'Star Wars'' better assets was the fact that all the hardware looked like it had been used and therefore increased the amount of versimilitude. With everything looking all spiffy and new in Buck Rogers we lose another element that keeps our suspension of disbelief up.

There are a few bright spots in the movie. One of the best sequences is the one where

Buck and his robot companion go walking through the radioactive ruins of South Chicago after dark and wind

up getting chased by mutants. Come to think of it though, it

by Dan Webb

isn't too safe to walk through South Chicago nowadays either. Another amusing bit is a futuristic dance which I swear must be a cross between the minuette and disco dancing. It looks very involved and in-

up in no time. The movie has it's fun bits, but it's not really worth sitting through the schlock to get to them. Pick up a science fiction book instead. It's cheaper and if you pick up the right one

tricate, but our hero picks it

'Stupid to complain'

students in protest of poor food

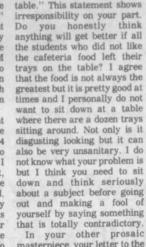

Wizard's Words

In last week's edition of The Pacer we, the readers, were nce again confronted with the fact that "ignorance is bliss."

Yes, I am speaking about the two articles written by Robert Meyers concerning the quality of the food in the UTM cafeteria in comparison to Morrison's cafeteria, and an editorial about the SGA which was printed in a recent edition of The Pacer.

I am certainly happy that Meyers found a place where he could gorge himself on \$4 while also getting a chance to look at a carpeted floor. I respect your opinion, Robert, which is that you think of the cafeteria food as substandard. also agree with the reply given by Mr. Broderick's assistant in regard to your complaint. If you do not like the food served here why do you eat here? Surely there is me other place besides Morrisons where you could eat, drink, and be totally satisfied. In fact, a lot of people enjoy such establishments as McDonalds, and Wendy's even though there isn't any carpeting on the floor. Try something else, because it is stupid to complain about the UTM cafeteria and then eat here.

I totally disagree with your closing statement in your article which said "I believe that if something positive is not done this quarter, the

masterpiece, your letter to the editor about the SGA was kind and considerate toward the SGA members but it also made some freshmen and transfer students feel inferior. Some of the reasons given for a nonexistant Faculty Hand-book were: (1) it would only benefit the freshmen; (2) by the time it was published the freshmen would already know which teachers to take; (3) the deficit in SGA funds at the beginning of Fall Quarter and the fact that there were some t things written in the handbooks which caused hard feelings on the part of some

two people who liked each other never got together because both were too shy to say hello. I like you too much to let that happen to us So, once again.

STEPHEN WARREN ******

ding the beginning of their professional lives looking at the outside of closed doors. As the job market requires increased specialization, the transition from campus to career may well become as crucial as the quality of educa-

on itself.
While students around the country grapple with this growing dilemma, some students in Washington, D.C. are exploring practical solu-tions. "For me, the need to have actual job experience before I graduate is extremely important," says Al Way, a student at The American University whose major is Design and Communications Way works part-time for Pasley, Romorini & Canby Advertising, Inc. as an assistant to the art director.

"In my field, marketability comes in a portfolio. My op-tions are improved substan-tially if I can show some professional jobs instead of just classroom projects. Working here, I get the chance to use my acquired skills in a real work situation," he said.

Through the university's Cooperative Education Program, Way is earning college credits for the work he does on the job. Other progams, of-fered during the Summer Ses-

from American University

sions, give qualified students the opportunity to serve in-ternships for selected govern-ment and private sector agen-cies. During the internshps, students have the opportunity to pursue professional acquaintances which may be useful after graduation.

Washington is a city of pro-fessional and technical workers. It has the greatest percentage of college graduates employed of any U.S. metropolitan area. 67.8 percent of its work force is white college. It has the largest white collar. It has the largest number of employed life scientists, physical scientists environmental scientists, social scientists, psychologists, and mathematical computer specialists. Cultural and economically, the area is alive and vigorous. It is a city of young people performing significant professional func-tions in the arts, humanities, business and govenment. These indicators speak directly to the internship programs at the American Universty. The program, while it is not a job placement or a career search program, does afford the serious student a unique opportunity to learn while doing in a variety of specialized settings.

four part harmonizing by the audience. A rocking chair and its occupant kept time with the washtub bass and a foot stomping beat.

Proud Mary rolled down the river while Molly was seen running through the fields with Ken and David Watkins right behind. Also Garv's Gang was there with guest appearances by Johnny Carson

It was announced that Ellington held one of its annual Mudslides that afternoon. These are held anyday that the UTM intramural softball games are rained out. There was plenty of slipping, slidding and mud for all with a much deserved shower needed afterwards.

Wine, women and pregnancy

House Call

Mothers-to-be are always warned that the child in the womb is at risk of birth defects and poor development from drugs taken during preg-nancy, especially in the first months after conception. The pregnant woman is often aware that she should be careful about even mild medications and should take no antibiotics, tranquilizers or other potent drugs unless it is un-

But many women do not think of alcohol as a drug. And scientists themselves cannot tell us the lowest level of alcohol use that will affect the unborn child.

Nevertheless, alcohol is known to be a toxic drug, one which enters the mother's bloodstream quickly and circulates through the blood-stream of the unborn child. The fetus is much the more vulnerable of the two people involved. Unlike the parent who takes the dose, the child who also receives it is in the midst of life's most critical stage of develop-

Heavy maternal drinking during pregnancy is a widely recognized hazard to the fetus. Alcoholic mothers commonly have low-birth-weight, poorly developed babies with small heads, abnormal features, birth defects and jittery, irritable temperaments. One specialist in maternal nutrition says that alcohol consumption during pregnancy results in 6,000 defective births each year. Miscarriages and stillbirths are also common in chronic heavy drinkers.

People who are moderate drinkers want to know if there is a threshold dose below which

Retreat termed 'success

Staff Reporter

Leadership skills, motivation techniques, and com-munication skills were some of the objectives stressed during last weekend's leadership retreat co-sponsored by the Undergraduate Life staff and SGA, said Dr. Donald Sexton, director of Men's Activities and coordinator of the

Approximately 50 students, representing a variety of cam-pus organizations, paticipated in the annual weekend workshop termed by many as the "largest and most successful" held.

Dr. Sexton said the group left UTM early Saturday mor ning for Reelfoot Lake State Park and returned early Sunday afternoon.

"We began our first session before lunch on Saturday and ended the last session shortly after lunch Sunday," Dr. Sex-

224 LINDELL ST.

After arriving at Reelfoot, the students separated into five groups giving each student the opportunity become familiar with other

'Many of the students didn't know each other," Dr. Sexton said. "This gave the students the opportunity to really get to know each other.

The session also allowed the participants to interact and share concerning problems many experienced as a leader of an organization, Dr. Sexton explained.

'This was a good chance to see the dynamics of group process in action" Sexton said. Dr. Sexton pointed out that

no lecturing occurred during the retreat.

"It was entirely a group process; we were all working together to accomplish similar goals," he said.

Other sessions, led by m e m b e r s o f t h e Undergraduate Life staff, in-

goal setting, and communica-

'The participation and en thusiasm in these sessions was vigorous, to say the least," Dr. Phillip Watkins, vice chancellor for Undergraduate Life and one of the leaders of the retreat, said.

Dr. Watkins added that the active participation of the students made the retreat the best he has attended.

Dr. Sexton also found the participants highly motivated and enthusiastic.

'There's something about going off together as a group and eating and sleeping together; it gets everyone inracting with each other," Sexton said.

David Griggs, newly elected SGA secretary of communications found the retreat highly nteresting and informing.

"I learned a lot this past weekend; the retreat was fantastically planned and advanced perfectly," Griggs said. "There was never a lull

during the entire weekend." At the end of the sessions, the students were asked to fill out evaluation sheets giving their opinions of the weekend and allowing them to make suggestions on how to make future retreats better.

"Most of the responses suggested a longer retreat, such as leaving on a Friday after-

noon,' Sexton said. Other suggestions included more recreation time and the

Dr. Sexton thanked the SGA for their help in making the retreat the success it was.

the victory. Playing at the number two position, Vickey Holder was defeated by Lucia Ouellette, 0-6, 4-6. Lisa Patterson lost to Jane Olson, 6-4, 3-6, 1-6, while Patty Bowen of Southwestern defeated Donna Abernathy, 6-3, 6-1 at the number three position. Sandy Buswell of UTM, playing at number five position gained the only win for the Lady Pacers defeating Dana Love, 7-6, 6-4. At the number six position, Cathy House was defeated by Sherri Simms, 2-6,

In doubles action, the team

lost to Lynn and Ouellette, 1-6, 0-6. Holder and Buswell were defeated by Bowne and Olson, 0-6, 2-6. In the number three position, Teresa Roach and Lavon Giddens were defeated by Love and Simms, 1-6, 1-6.

"We played fairly well considering our lack of competitive experience," said UTM Lady Pacer coach, Darcy Holland. "We are not accustomed to playing exceptionally long points and we had to at times.

"We just fatigued before the other team," she said.

<u> 2018-80 08-80 08-80 08-80 08-80 08-80 08-80 08-80 08-80 08</u>

When you get depressed down at the mouth The wind blows from the North Instead of the South Partake of the joys That come in a pouch It's called Tobbacco it fits in your mouth It'll brighten your life as it yellows your teeth It smells so delicious it's taste is so sweet Chew some today but learn how to spit Or else it will gag you or perhaps get you lit! **Barry Warbritton**

But in 1979, the Year of the

Spectrum

Deep Sea Diver, underwater basket weaving took on a whole new significance, for it became the start of something eferred to as Pacers, and

were soon a way of life for the Pacers. People jumped right in and dog paddled to class, side-stroked to the University Center, and swam any way they could downtown

The bikini (for both males and females) was agreeed upon as the official uniform for all underwater Everybody's favorite song was "Back Strokin' Side by Side," by Flipper and the Flatfish, and Charlie the Tuna became the official Pacer mascot.

This just goes to show that while a little bit of rain may hurt, a lot of it can be fun, exciting, and educational as

Until swimming became the school's favoritesport, I had no idea that you could fit people into a string bikini (two comfortably).

Rockin' round the clock...

Dancing the night away helps in fight against MD

By SUZIE BRONK Assistant News Editor

The fourth annual Sigma Alpha Epsilon danceathon benefitting Muscular Dystrophy ended Saturday night with ten tired and proud dance couples and a record \$4,400 pledged.

The dance marathon started at 6 p.m. on Friday, April 20 with 16 couples. A small cheer-ing section accompanied the dancers during most of the event. The crowd was especially large around mid-night after the downtown nightspots closed.

Each couple was sponsored with pledges for the duration of their dancing. These pledges are used by the judges to determine the winners.

"First place was captured by Alpha Gamma Rho with \$1,225. The winning couple from AGR was Lisa Rainey

and Bob Bauchmann. Gamma Sigma Sigma placed second with \$577 and Sigma Kappa was third with \$286." said Allen Curtis, SAE chairman for the danceathon.

"The standings will not be final until the pledges are col-lected and turned in at the SAE House. This must be done said Curtis. May 9,' "Everyone who danced worked together and made it a joint effort. I'd like to thank them for putting up with the 24 hours worth of stress.'

The winning couple will receive two ten speed bikes. AGR and GSS are entitled to a night free at the Oz for their members and their dates. They also each receive a keg

"It was a lot of fun and it was definitely an experience, said Shelia Hudson

again though. It's a lot of work but it does make you feel good when it's over," said Hudson.

"The main sponsor for the special thanks is Tom Lattus of Lattu Distributing Co. He helped us a lot with the public relations and he donated the trophies and the beer. We'd also like to thank Wendy's Hamburgers of Union City and K&N of Martin for the food they donated for the dancers and Gibson County Tractors and Walmart for donating the ten speed bikes," said Curtis.

"Alpha Phi Omega was glad to provide our musical services to the SAE's and congratulations on another great danceathon," said Chris "Wizard" Armstrong, an APhiO soundman for the

Baseball camp scheduled: individuals, for groups

Individual and group instruction in the fundamentals of baseball will be offered to people from 9 to 13 years of age during the UTM Baseball Camp, June 4-8.

According to Vernon Prather, UTM head baseball coach and camp director, the five-day camp will feature the aspects of the game of baseball.

"We are looking forward to a good camp this year," Prather said. 'Each day there will be instruction on the proper way to field, throw, pitch, catch, and hit.

Campers will meet daily from 9 a.m. to noon at the UTM baseball field. Prather

The \$30 camp fee includes registration, instruction and all equipment except gloves. camp is limited to 50 participants on a first-come, first-serve basis.

Promote Women Conference...

Coy keynotes careers

'Individually, there will never be a point in your life where you will feel you are a success," Carol McCoy said to approximately 300 people attending her keynote address at the Promote Women nference Tuesday. But long as you set standards Conference Tuesday. and stick to them you will be a

McCoy, an attorney practicing in Nashville and a member of the Tennessee Commission on Status of Women, spoke on the topic "Lifestyles and Careers." About herself she said her work is rewarding both personally and careerwise.

"There is a tremendous amount I have to learn," she says about her long working

and Sunday. "Easter Sunday is the first time I took off."

McCoy said there are several things you must ask yourself when planning a

"What is it that you want?" What are you willing to give up to get where you want? How do you plan to enjoy what you achieved? What will you do if in the process of earning an education you become pregnant? Being a parent is a job for the rest of your life and it should be included in the unexpected demands in career planning.'

Saying there are rewards in different areas of a job as there is with parenthood and being married, she said some job benefits include expense apartments. entertainment

counts, insurance, and cars with chauffers.
According to McCoy there

are several things a professional must be aware of when accepting a position and while on the job.

You must learn the informal rules of entering the job market. And avoid becoming involved in office gossip," she says. "Find the leaders and role models because you need someone

able to let your employer know your qualifications and worth-show you deserve the job and advancement. You must determine the longevity

of your job and see that a promotion will not always furthering your career.

As to how to determone what being a success is McCoy says, "It is easy to decide what success isn't and what power isn't. It is hard to decide what it is." She recommended Jane Trahey's book "Women in Power" as a guide to career planning and how to be successful.

Elizabeth Smith, consultant for the Tennessee State Department of Education and member of the Tennessee Commission on Status of Women, gave the wrap-up talk after the workshops and the luncheon.

"No woman is not in a career--each of us is a homemaker," she said. In the different workshops I heard continual reference to managing the other career of homemaker.

In summing up the con-ference Smith listed four

"You must have a goal-a career plan. The career is the fruition of planning."
"You have to adopt what

you see to your plan. You need to adopt a mode of dress as Adopt a certain attitude, and a mode of speaking to the situation. You shouldn't feel you are abandoning the self by adopting what is accepted.

"You must adapt your career plan to flow with the

"You have to evaluate what you have done and whether the plan was suitable. And you are going to have to stick our neck out sometimes to tell someone they are wrong and to take a risk to change

Billie Ann Pace, director of women's activities and co-cordinator of the con-ference, said of the conwomen's ference, "We felt like we had excellent speakers. We were specially thrilled to have Martha Olsen make her last official visit as executive assistant to the Chancellor of the University of Tennessee at Nashville before becoming Assistant Commissioner of

Tennessee. The conference committee members met their responsibilities as they usually do and we would like to thank the ATO's for their hospitality and allowing us to have our reception at their

Bonnie Rice, coordinator of Placement and co-coordinator of the conference, said about the small attendance of UTM students,

'I was extremely disap-

pointed by the very low if nonexistent attendance of the college women. It bothers me bacause it is one of those missed opportunities they will really regret in the future. We had some really outstanding women from various careers who were right here on campus. Students didn't have to make any effort to hear

them and they just didn't come. There is no way better to get ideas for how to get a job but by talking to people in the jobs. I was real pleased to see the high school students here.

I was pleased with how it turned out, but disappointed in

Energy audits conducted; potential savings identified

Energy audits conducted by specialists from the University of Tennessee have identified potential annual savings of nearly \$2.2 million and lifetime savings of \$32.5 million, a UT offical said to-

Dr. Charles E. Smith, vice president for public service, said the savings figures are detailed in energy audit reports prepared for local government and industrial officials in Davidson. Henry and Sullivan Counties. Sullivan Counties.

"The 226 audits began in late 1977 and ended March 31 of this year," Smith said.
"They were conducted by specialists from three UT public service agencies as part of the overall Tennessee Energy Authority-Energy Extension Service pilot pro-

Speaking to the Paris Rotary Club, Smith said the UT energy audits uncovered potential annual savings of \$86,436 in the 26 public buildings inspected in Henry County and \$195,000 in the private business audited.

"Our figures for Davidson County showed annual savings potential of \$844,063 in 48 public facilities and \$552,000 in the 60 private structures," he said. "For Sullivan County, the possible savings total \$307,704 annually in 50 public

buildings and \$133,000 in the 27 private structures." Smith said the audits were

conducted by staff of UT's Center for Industrial Services, County Technical Assistance Service and Municipal Technical Advisory Service. The latter two agencies were responsible for the city/ county institutions portion of

county institutions portion of TEA-EES, while the Center audited small business and in-

dustries in the three counties. "The \$32.5 million lifetime savings figure represents potential savings in the public sector only," Smith said.

He added that the three city/county specialists estimated that the full lifetime figure could be achieved by spending \$1,836,942 for capital improvements in existing facilities, an amount that would be recovered in less than two years based on savings projections.

"The \$2.2 million annual figure represents a potential payback of more than \$6 for every taxpayer dollar spent on these components of the TEA-EES program," Smith said. He added that a payback of more than \$180 for every

dollar spent was possible if all of the lifetime savings potential was reached.

"I believe you must agree with me that few federallyfunded programs can claim they can save the taxpayer money;" he said.

Smith said the first phase of the pilot program has ended, but additional federal funding

Thursday-Friday.

will continue the work through Sept. 30, 1979. Weakley and Washington Counties have replaced Henry and Sullivan Counties in the governmental portion of the program. In the small business sector, the program have been exceeded to all gram has been expanded to all 95 counties.

"Funding for the TEA-EES program beyond September 30 is unclear," he said. "However, we would like to believe that the federal government will provide the level of support needed to have the same type of impact throughout the state.

Smith said continuation and expansion of the program were particularly critical as a result of rapidly escalating energy costs and predicted shortages.

Employment position available

Do you need employment? A position has become available in one of the local Veteran's Affairs Office.

For particulars about the position, the pay, and the hours, stop by the Veteran's Affairs office and talk with

Army ROTC can help you develop two career op portunities after college

First, Army ROTC gives you two years of practi-cal management training and leadership experience while you're still in school. Extra credentials that will set you apart in the civilian job market

Second, Army ROTC offers you a part-time leadership opportunity as an officer in the Army Reserve or Army National Guard. That means extra income, management responsibility, community involvement.

Two careers. For details, contact:
